

GENERAL YOSHON NEWS

G'mar Chatima Tovah!

A “Late” New Season

A sweet new year to all, as we embark upon an unprecedented *chodosh* season. Despite the fact that we have been telling people for the past two months to stock up, we still keep getting the question “Has Yoshon started yet?”, and this year, there is no good excuse to have missed stocking up before the start of the *chodosh* season. All of the dates are later this year than ever before.

There is also good news in that a few standard items are back, such as *yoshon* winter wheat for General Mills, Post and Malt-O-Meal cereals, Ceresota and Heckers flour and Gold Medal “KC” all being *yoshon* made from winter wheat, (except of course for the Malt for those holding the stringency).

Now that most of the dates are in, we ask that you please be patient with us as we work to update Yoshon.com. We are a volunteer-only nonprofit with very limited staff, so it takes some time to update our site.

Before asking product questions to our WhatsApp Group Admins, text, private chats or emailing, please first scan products or try to look them up on our site. It makes for more time efficiency, as we can be updating the website instead of answering questions, that are often able to be determined on one’s own from the product listings. Thank you for your patience!

“P&H, Great Plains, Compliments and any flour with a “PH” in the date code

P&H Milling, plants (0)7 and (0)9 are starting new crop. The lot # will start with a 3 (for 2023) then xxx for the date then xx for the plant i.e. 323607. Use codes 3 236 for plant 07 and 3 240 for plant 09. At times, the “0” before the plant code may be missing, i.e. 3 236 07 = 3 236 7.”

August 22, 2023 – Flour Update from COR Canada

“*Yoshon* c/o Ardent Mills - Saskatoon plant

Robin Hood, Bakers Hood, Master Hand, Golden Temple or any flour with a COR323

Ardent Mills in Saskatoon has just started using new crop in its All Purpose and Bread flours (commercial and retail). Most packaging will identify this plant with an ‘SK’ as part of the date code. A date coding of 3-229 or lower is still 100% *yoshon*. Anything higher may have a very small percentage of new crop mixed in. Some retail flour will identify the plant with “548” instead of “SK” in the date code. That format will appear as 3-229-548. The Cake & Pastry flour from this plant as well as Durum and Atta flours are still *yoshon*.

All products from plant MT and plant code “547” are still *yoshon*.”
